

## Special Issue

### PROCEEDINGS OF THE 12th CONFERENCE OF ISTRO PART II Soil Tillage for Agricultural Sustainability

#### CONTENTS

##### Introduction

|                                                                                                                                                                                                                                                                           |     |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Tillage effects on soil degradation, soil resilience, soil quality, and sustainability<br>R. Lal (Columbus, OH, USA) .....                                                                                                                                                | 1   |
| Crop production through conservation-effective tillage in the tropics<br>J.R. Benites and C.S. Ofori (Rome, Italy) .....                                                                                                                                                  | 9   |
| Tillage systems and soil compaction in Africa<br>B. Kayombo (Morogoro, Tanzania) and R. Lal (Columbus, OH, USA) .....                                                                                                                                                     | 35  |
| A review of tillage methods and soil and water conservation in southern Africa<br>T.J. Willcocks and S.J. Twornlow (Bedford, UK) .....                                                                                                                                    | 73  |
| Tillage systems and soil properties in east Africa<br>J.Y.K. Zake (Kampala, Uganda) .....                                                                                                                                                                                 | 95  |
| Tillage methods and soil and water conservation in eastern Africa<br>E.K. Biamah, F.N. Gichuki and P.G. Kaumbutho (Nairobi, Kenya) .....                                                                                                                                  | 105 |
| Tillage and soil physical properties in semi-arid West Africa<br>R. Nicou (Ouagadougou, Burkina Faso), C. Charreau (Paris, France) and J.-L. Chopart<br>(Bouake, Ivory Coast) .....                                                                                       | 125 |
| Tillage systems and soil properties in West Africa<br>O. Babalola (Ibadan, Nigeria) and O.A. Opara-Nadi (Okigwe, Nigeria) .....                                                                                                                                           | 149 |
| Diurnal changes in moisture content and isothermal and thermally induced moisture fluxes<br>under n-tillage and c-tillage in Nigeria<br>E. Amézquita (Bogotá, Colombia), R. Lal (Columbus, OH, USA), D.J. Greenland<br>(Wallingford, UK) and D. Payne (Reading, UK) ..... | 175 |
| A review of the economic and ecological constraints on animal draft cultivation in Sub-<br>Saharan Africa<br>S. Ehui (Addis Ababa, Ethiopia) and R. Polson (Ibadan, Nigeria) .....                                                                                        | 195 |
| Tillage systems for root and tuber crops in the tropics<br>R.H. Howeler (Bangkok, Thailand), H.C. Ezumah (Ibadan, Nigeria) and D.J. Midmore<br>(Tainan, Taiwan) .....                                                                                                     | 211 |
| Rainfall for tillage management decisions<br>J. Morin (Jerusalem, Israel) .....                                                                                                                                                                                           | 241 |
| A study of some tillage practices for sustainable crop production in India<br>R.P. Gupta and I.P. Abrol (New Delhi, India) .....                                                                                                                                          | 253 |
| Tillage methods related to soil and water conservation in south Asia<br>G. Singh (Dehradun, India), K.B. Laryea (Andhra Pradesh, India), S.P.S. Karwasra (Hisar,<br>India) and P. Pathak (Andhra Pradesh, India) .....                                                    | 273 |
| Conservation tillage and seeding systems in the South Pacific<br>M.A. Choudhary and C.J. Baker (Palmerston North, New Zealand) .....                                                                                                                                      | 283 |

|                                                                                                                                                                                                     |            |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------|
| Tillage methods and soil and water conservation in Australia<br>D.M. Freebairn, R.J. Loch and A.L. Cogle (Brisbane, Qld., Australia) .....                                                          | 303        |
| Soil physical and chemical changes due to tillage and their implications for erosion and<br>productivity<br>I.J. Packer (Cowra, N.S.W., Australia) and G.J. Hamilton (Perth, W.A., Australia) ..... | 327        |
| Tillage methods and soil and water conservation methods in the Caribbean<br>F.A. Gumbs (St. Augustine, Trinidad and Tobago) .....                                                                   | 341        |
| A preliminary model estimating soil specific resistance to ploughing<br>A. Canarache (Bucharest, Romania) .....                                                                                     | 355        |
| The effects of agricultural use on the structure and physical properties of three soil types<br>H. Domżał, J. Hodara, A. Słowińska-Jurkiewicz and R. Turski (Lublin, Poland) .....                  | 365        |
| <b>Announcement from the Publisher .....</b>                                                                                                                                                        | <b>383</b> |
| <b>Author Index.....</b>                                                                                                                                                                            | <b>384</b> |
